1. **IH Exposure Monitoring, R. Selvey**

   - 4.5 SHSD Industrial Hygiene SMEs were reallocated as SH Representatives and deployed to line organizations. There is 1 additional dedicated IH employee dedicated to monitoring. 1 CMS employee is dedicated part-time to sampling. 2 summer interns started in June and will remain through the end of the fiscal year.
   - Rad Con devoted 1 FTE to noise surveys, other FS Representatives on a part-time basis.
   - CAD and Life Sciences are conducting some chemical monitoring.
   - IH Scheduler inventory is completed and monitoring is being done.

2. **Ergonomics Program, N. Bernholc**

   - Going around mostly by request to do ergonomic surveys.
   - Assistance in the modification of workstations or ways to improve the current workstation.
   - Problem → Intervention → Follow-up
   - Office is the bulk of what is being surveyed.
   - Marteenio is looking at CAD operators, trying to see how they compare across the site.

3. **OSHA Verification Audit Update, K. Erickson**

   - Finding blocked panels are re-blocked. They need to be marked with yellow & black tape. Must be more aggressive on marking blocked panels.
   - The use of flammables in a hood:
     o Would like to see in ESRs the use/storage of flammables in the hood.
     o Evaluate and explain the use in the ESR.
     o Can rules be posted in each hood?
   - Eyewashes were evaluated.
     o What about eyewashes that are not in each room? It is OK to have an open path to an eyewash in the hallway.

4. **Chemical Hygiene Assessment, K. Erickson**

   - Limited in scope to most of small sciences that use chemicals.
   - CMPMSD, EENS and Instrumentation were assessed.

5. **OHSAS 18001, R. Selvey**

   - Issue – wording of objectives
     o Use of the words "maintain", "continue", etc.
     o Objectives are supposed to be improvements, not maintenance. Move "maintains" to a new section in the self-assessment.
   - General consensus is that people want the site-level documentation to replace the OSH manuals.

6. **S2 and S3 Programs, R. Selvey**

   - Would like to see the link to the S3 Program off the main SHSD or ESHQ homepage. (This was added to the ESHQ homepage and the Lab A-Z listing on the intranet homepage.)
